# IDENTIV

Freedom Cloud

Access Control as a Service (ACaaS)

Hosted in Identiv's secure cloud infrastructure, access control via Freedom Cloud is available anytime, anywhere.

Freedom Cloud brings robust, feature-rich Freedom Access Control software to Identiv's Access Control as a Solution (ACaaS) portfolio. Available anytime, anywhere, and hosted entirely by Identiv, Freedom Cloud can manage all aspects of your access control system remotely.

As a cloud-based solution, Identiv ensures that Freedom Cloud software is patched, upgraded, and maintained seamlessly with no interruption to daily operations. Compatible with all Freedom Encryption Bridges and tertiary devices, Freedom Cloud delivers the flexibility to meet the needs of even the most complex business, personnel, and facility requirements.

Hosting Freedom Cloud in Identiv's secure AWS virtual environment ensures a protected data path while supporting access through any compatible browser on any device. Administrators and users get the flexibility to access the full capabilities of Freedom regardless of their location. Freedom's web-based administration is intuitive and easy to use.

Accessible 24/7, Freedom Cloud system operation is always available and up-to-date. In the event of a loss of network connection on-premises, the local tertiary Freedom Cube server included at no charge ensures seamless operation until the connection is restored.

24/7 Open Accessibility

- Cloud-based ACaaS means access to software is available anytime, anywhere
- Accessible via any device with compatible web browser

Safe and Secure

- Stored in Identiv's secure AWS environment
- Easy to limit credentials to only those who need access

Worry-Free Updates

- No need to manage upgrades and patches, your system is always up-to-date
- Updates occur seamlessly in the background with no operational interruptions

Redundancy and Failover

- Included local redundant server at no additional cost
- Ensures no interruption in operation during network outage

Core Features

Mustering	Robust mustering module
Email Notifications	Can be tied to alarm and port triggered action events
Maps and Alarm Monitoring	Separate web page for just alarms and map monitoring
Unlimited Schedules, Access Groups, and Users	No cap on users, schedules, access groups, controlled areas, etc.
Badging	Built-in browser-based badge editor
DB Replication	Ensure failover capability with tertiary server devices
Optional Software Integration Modules Available	Integrations include: • Assa Abloy • Active Directory • Kontakt.io • 3VR, Milestone, and Exacq

ACaaS Benefits

Always Up-to-Date	Updates and patches occur automatically, giving you peace of mind
Anytime, Anywhere	Access available anytime, from anywhere
Cost-Saving	Less up-front costs and reduced on-premises architecture

FREEDOM by IDENTIV   **LIBERTY** by IDENTIV

ENTERPHONE by IDENTIV

On January 3, 2019, Identiv announced the acquisition of substantially all assets of the **Freedom, Liberty,** and **Enterphone™ MESH** products and services of **Viscount Systems, Inc.** The Freedom, Liberty, and Enterphone product portfolio provides next-generation, IT-centric access control and telephone entry solutions.
