

## Enterphone Cube

Web-Based Visitor Entry and Access Control Software Server

■ **COMPLETE**

Built for facilities requiring up to 16 card readers, elevator control, and telephone entry with an expansion option to get to 32 readers

■ **INTEGRATED**

Standalone visitor entry and access control system or can be used as a distributed database appliance

■ **WEB-BASED**

Programming interface via Ethernet or direct connection

Enterphone Cube by Identiv is a bundled appliance that hosts web-based access control software for facilities requiring up to 16 card readers, elevator control, and telephone entry. Each Enterphone Cube can manage a single panel or can be used as a distributed database appliance working with other Enterphone Cubes, Enterphone telephone entry panels, and Freedom by Identiv. Enterphone Cube supports card readers through the addition of an IP-based Freedom Encryption Bridge.

**Features and Benefits**

- Expands up to 16 readers with an Enterphone Cube, with an expansion option to get to 32 readers
- Appliances are interconnected via WAN/LAN
- Unlimited users and cards
- Unlimited administrative users
- Full-access, view-only, and no-access administrative permissions by parameter
- Unlimited schedules and groups
- User selectable event history with purge and/or export
- Open interface to HR and IT database(s)
- Forced entry and door ajar monitoring
- Direct connect keyboard and mouse
- Rack mount or wall mount options
- Web-based programming interface via Ethernet or direct connection
