

The Top Ten Reasons Identiv Smart Card Readers Are The **U.S. Federal Government's Gold**

1

Identiv adheres to industry standards, including ISO 7816, PC/SC, and USB CCID.

6

Identiv's smart card reader division is a dedicated business unit, not an offshoot of another division.

2

Identiv has been supplying smart card reader solutions to the Department of Defense and federal government since the inception of HSPD-12.

7

Identiv's smart card readers have faster throughput as compared to competitive offerings (in some cases, 50% faster).

3

Identiv is a U.S. company based in California. Smart card readers are manufactured in TAA-compliant nations.

8

Identiv has expertise in custom board layout, antenna design and tuning, firmware development, and driver development. Identiv can customize readers with logos and different color plastics, cable lengths, and connectors.

4

With vast OEM capabilities, Identiv offers the largest form factor portfolio of modules and desktop smart card readers of any company in this space.

9

Dedicated engineers keep drivers and firmware consistently up-to-date and Identiv has IP around firmware and OS.

5

Identiv is the trusted brand for smart card reader technology and the company's contactless expertise is considered the best in the industry.

10

Identiv is the only smart card reader manufacturer to work with OtterBox's ruggedized case systems.
