

# Freedom Mobile

Frictionless Access Is in the Palm of Your Hand

The Freedom Mobile application allows for access to a controlled environment using the native GPS on a user's mobile device.

Identiv's Freedom Access Control System is an IT-centric, web-based solution; Freedom Mobile is an extension of that complete solution. The Freedom Mobile application allows for access to a controlled environment using the native GPS on a user's mobile device, replacing the need for a physical credential, such as a card or fob. Credentials are derived from the Freedom Mobile app and are unique to each mobile device. Using the GPS location of the user's phone, combined with the GPS location of the access point, access is granted using only the mobile credential. With Freedom Mobile, issuing and managing mobile credentials has never been easier.

The Freedom system offers the ability to create a mobile onboarding email template that can be defined by the administrator, allowing for the sharing of the iOS or Google Play store link, as well as login information for the mobile app, ensuring a seamless, hassle-free mobile enrolment process.

Defining the geolocation of a door can be simplified by combining Freedom with the low-profile Kontakt.io GPS beacon solution, which can be discreetly placed at a door. With this API integration, assigning a beacon to a controlled area is as simple as choosing the appropriate beacon from a drop-down list.

## Mobile Credential

- Anyone with a mobile device has the power to derive their own virtual access credential
- Credentials are managed directly from the Freedom web administration page
- Users can be assigned up to three separate mobile devices for credential use

## GPS-Driven

- The location of a door is derived from its GPS location (i.e., coordinates or GPS beacon)

## Reader Not Required

- Users are able to gain access via Freedom Mobile
- No card, fob, or PIN is required
- No reader is required at the door

## Hands-Free Ingress

- Reduces touch points
- Curbs transmission of communicable diseases

## Freedom Mobile Specifications

Devices Supported	Apple: iOS 11.4 and later Android: 7.0 (Nougat) and later
Beacons Supported	Kontakt.io BP16-3 and SB18-3
Freedom Versions Supported	V11.2.1.1 and later

## Beacons Supported

**Kontakt.io**  
Smart Beacon BP16-3

**Kontakt.io**  
Smart Beacon SB18-3

On January 3, 2019, Identiv announced the acquisition of substantially all assets of the **Freedom, Liberty, and Enterphone™ MESH** products and services of **Viscount Systems, Inc.** The Freedom, Liberty, and Enterphone product portfolio provides next-generation, IT-centric access control and telephone entry solutions.
