

RFID Tickets

Durable Tickets with RFID Inlays and Labels

- **RELIABLE**
Proven performance in transportation and leisure applications
- **FLEXIBLE**
Design flexibility and paper or PET options available
- **AFFORDABLE**
High quality, low cost
- **DELIVERY**
Singulated, fan-fold, or roll configuration

Identiv's RFID Tickets are widely used in mass-transit and leisure applications, including stadium, ski-pass, event ticketing, access control, and more. Available in a wide range of configurations to cater to various applications, these smart tickets meet the requirements of single trip or temporary entry use, which require cost-effective and reliable performance across common radio frequency identification (RFID) standards.

Identiv's portfolio of RFID Tickets feature Identiv-specific RFID inlay and label technology and are provided in a wide range of form factors and sizes, though are typically rectangular or square. The front and back side of each ticket can be customized with branding graphics, RFID-chip encoding services, multi-frequency formatting, special effects, and other security features.

Benefits

- Leverage quality and performance from Identiv's RFID Inlays and Labels
- Flat surface guarantee with no module bump
- Special production support, including high-temperature requirements, chemical exposure, or mechanical stress
- Customized antenna design and dimensions and flexible materials, including paper, thermal direct paper, and PET (other options available by request)
- Production volumes with convenient order limits
- RFID-chip programming options (available at a premium cost)

Product Details

SPECIFICATIONS	
PROTOCOL AND CHIPS	ISO15693 and ISO14443, NFC Type 1, 2, 3, and 4, Broadcom, Infineon, STM, NXP, Sony, and more
BASE MATERIAL	PET with copper and aluminium etched antenna; specialized substrate for various applications
ESD	+2KV maximum peak, human body model (HBM), according to chip specification
STATIC PRESSURE	<10MPa
RELIABILITY	<ul style="list-style-type: none"> Thermal shock: -40° to 85°C, 100 cycles Thermal humidity: 85°C, 85% RH, 168 hrs
TESTING	<ul style="list-style-type: none"> Electrical inspection on 100% units Rejects are identified with a square or round mark
LABEL SELECTION	Paper, thermal direct paper, PET, etc.
PRODUCT RANGE	Blank, printed, singular, fan-folded in 1-in line, 2-in line and 3-in line, roll, etc.
OPTIONAL SERVICES	Serialization and encoding, etc

Note: Identiv's products are not designed, intended, authorized, or warranted to be suitable for life support applications or any other life critical applications that could involve potential risk of death, personal injury, or severe property or environmental damage.

Identiv, Inc. (NASDAQ: INVE) is a global provider of physical security and secure identification. Identiv's products, software, systems, and services address the markets for physical and logical access control and a wide range of RFID-enabled applications. Customers in the government, enterprise, consumer, education, healthcare, and transportation sectors rely on Identiv's access and identification solutions. Identiv's mission is to secure the connected physical world: from perimeter to desktop access, and from the world of physical things to the Internet of Everything.

Identiv has offices worldwide. Addresses and phone numbers are listed at identiv.com/contact. For more information, visit identiv.com or email sales@identiv.com.
