

10

Reasons to Choose Access Control as a Service

- 1 Virtual Benefits:**

ACaaS merges subscription-based software as a service (SaaS) with on-site access control devices.
- 2 Pay-As-You-Go:**

The subscription model preserves cash flow and adds to the upside of ACaaS without hassles or risks.
- 3 Less Upfront Costs:**

All data is stored at remote servers, not on-premises, making ACaaS much less expensive than legacy access control.
- 4 Cloud-Based Management:**

Control, manage, and maintain PACS via intuitive browser-based web administration.
- 5 Anywhere Operations:**

Grant the right access to the right people at the right time from anywhere in the world with 24/7 remote access control.
- 6 Centralized Monitoring:**

Back up and store data safely while accessing perpetual records of who entered controlled areas or applications.
- 7 Unburdensome Platform:**

ACaaS lightens the hardware load organizations have to deploy and maintain.
- 8 Virtual Troubleshooting:**

Widely distributed work forces are the norm and the need to troubleshoot remotely is critical.
- 9 Scalable and Flexible:**

Include more doors and assign different access levels to cardholders without changing hardware or obtaining additional software.
- 10 Peace of Mind:**

The system is up-to-date with the latest features and software, and the software is patched and upgraded automatically.
